Grandpa Moe

Grandpa Moe is known in the family as the Human IMDB. Grandma Gertrude likes to test him — she names actors, and Grandpa Moe instantly names all the movies they've been in.

Below are eleven actors, each listed above a film he or she appeared in. Each actor/movie pair is encrypted as a simple substitution cipher, with the code changing for each pair. To help you identify the actors, they're pictured in alphabetical order by last name at the bottom of the page.

When you've filled in the actors and films, the letters in parentheses, reading down each column, will reveal the genetic advantage that makes Grandpa Moe such a movie trivia whiz.
