

# The Un-redacted Truth about Area 51

By Dan Bennett

Thanks to the internet, secrets about alien invasion are much harder for the government to keep from its citizenry. For example, Wikipedia is a rich source of information about Area 51, constantly being contributed, vetted, and edited by experts and ordinary citizens whose only interest is the truth. The US Air Force and intelligence community naturally make lame attempts to obfuscate what really goes on in Area 51. Recently they scrambled the letters from two consecutive words from several sentences in the wikipedia entry, creating anagrammatic nonsense out of hard, extraterrestrial fact. But we can fix it! Find the nonsense in each of the sentences below and unscramble it to find the two words that should appear in that sentence. Note, the answer is always two words, but the nonsense may not be.

Its secretive nature and undoubted connection to classified aircraft research, together with reports of unusual phenomena, have led Area 51 to become a focus of modern UFO and conspiracy theories. Some of the activities mentioned in such theories at Area 51 include:
