

Playing Card Must/Can

by NeilFred Picciotto (Renfield)

Form the longest word you can using the given letters. Each capitalized letter **MUST** be used at least once; each lower-case letter **CAN** be used zero or more times. No other letters may be used.

The number in parentheses is the longest word fitting the constraint that's in the "Enable" word list, but shorter answers are fine too. The ones with (?) have no matches in that list.

AcE Diamond (12)
