

TWIN CITIES by Mike Selinker (Slik)

Harry the Harried Traveler has lost his itinerary, and he needs your help to reconstruct it. He knows the states and/or countries he's going to, and that between each pair is a city with the same name. So if he's going to KANSAS CITY, that would be found between KANSAS and MISSOURI. Figure out what city fills in each blank so that you can tell Harry where he's going. Some pairs may have multiple answers, but you can tell what's what by reading his anguished complaint spelled out in numerical order.

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27
