

In Knight's Boggle, like regular Boggle, you make words from letters in a grid. In this case, it's an 8x8 grid, like a chessboard. However, in Knight's Boggle you can't use neighboring letters; to get from one letter to another in a word, you must make a KNIGHT'S MOVE – one square in one direction and two squares in another direction.

In the chess problem known as the KNIGHT'S TOUR, a knight can move around the entire board and visit every square exactly once, never revisiting any square in the journey. Similarly, in Knight's Boggle, once you have visited a letter in the grid, you can't visit that spot again in the game. (You can pass by the spot while making a knight's move; but you can't stop there.)

So in the grid below, you can make the word PESTO

T	I	F	I	E	S	E	C
R	E	E	I	I	O	I	O
E	E	I	E	D	G	T	I
E	G	Y	P	A	D	F	T
I	I	S	R	P	E	T	T
O	K	N	O	W	U	E	L
C	T	L	F	L	T	Z	M
U	D	O	A	A	R	I	K

You can start in any square. Words must be three letters or more. No proper nouns, acronyms, abbreviations, etc. For those who are interested, the squares were generated with Scrabble distribution of letters. Blanks (wild cards) are denoted by * and can be used as any letter.

Here are some ways you can play:

- Find the most individual words you can. Each word can start anywhere as long as you're not revisiting a spot
- Make a chain of words: you must make a knight's move to get from the last letter of the word you've just completed to the first letter of the next word. How long a chain can you make?
- Make the longest word or words you can find.

Remember, once you have visited a spot and used the letter in that spot, you cannot visit that spot again!

We've given you two identical copies of each grid in case you want to try more than one way to play.

V F Y O F A R C
